## NO GENERAL CHANGE.

The Condition of Trade is More Favorable, but Still Quiet.

IRON IS A SHADE MORE STEADY.

Element of Anxiety. RESULTS OF THE PLOOD DISASTERS

PEPECIAL TELEGRAM TO THE DISPATCE. NEW YORK, June 14.—Special telegrams to Bradstreet's continue to report only a moderately favorable condition of trade. The increased activity at Philadelphia, notably in lumber and iron and in general lines, is due to the reopening of rail communication, which was interrupted by floods in Penusylvania. There is also some improvement in demand for and shipment of staples at St. Louis, Chicago, Kansas City, Galveston, Des Moines and Memphis, and at Louisville and Cincinnati business is reported fair. Our low preliminary estimate of \$45,000,000 loss of property by the floods in four States is more likely to be reduced than otherwise. The wheat crop propects have not improved since June 1, out the outlook for cotton is rather better

since the Louisiana drouth has been broken.
At Baltimore, New York and Boston trade is quiet with country produce, naval stores and furniture relatively most active. Numerous inquiries have induced Bradstreet's to examine the "Anti-Trust" legis-lation of Missouri, Kansas and Texas, and it is found that such legislation is not, as has been widely and erroneously published, directed against mercantile contracts generally, but is aimed against contracts or combinations designed to limit or control production or prices.

Under the influence of renewed speculative interest the New York stock market is active and tends higher, attention issug rapidly transferred from one stock to another. Bonds are very strong under in-creasing investment demands. Money at New York continues easy in spite of large gold shipments the amount of specie engaged to-day aggregating \$3,975,000. Call loans 2@2½ per cent. Foreign exchange to continental Europe is very firm, though sterling is easier, demand sterling being quoted 488% (0489.

THE IRON SITUATION.

Pig iron is generally stronger, particularly in Pennsylvania and Ohio. Southern irons are not being pushed. There is a growing confidence in both the iron and steel trades. About 40,000 tons of steel rails have been placed in Western and Eastern markets. The additional allotment, 200,000 tons, will cover requirements for the next six weeks. The over-sold condition of British rail mills may shift some Canadian and Mexican orders to American markets on a basis of \$27 or \$27 50 at mill.

While sugar prices continue to advance, having gained 1/4@7-16c this week on smaller visible stocks, unfavorable crop reports, firmer cables and pronounced activity for refined, interest now centers on what we are to receive and where it is to come from. Refiners' stocks are greatly depleted, and the outlook is for a demand for unusually large supplies, with a dearth of them in sight. Sugar Trust certificates have advanced from \$85 50 in March to \$110, with higher figures in prospect. Large coffee crop reports and light distributive and speculative demand again depressed the staple, the decline being about 1c.

The Government cerealicrop report tended to depress prices, being interpreted as very favorable, but later weather and crop re-ports, backed by speculative influences, served to advance wheat on the week 13/6 advance on light deliveries, but shows a gain of %c. Rye is up 3/c on bet-ter export demand. All Australian wheat exports have ceased, supplies on hand being needed at home.

SHIPPING WHEAT.

San Francisco wires that inquiries for wheat are received from Montevideo, that 60,000 bushels have been shipped to Rio Ja-neiro, and that the total of wheat stocks in California June 1 was only 3,487,383 bushindicating that only 660,000 bushels will be carried over July 1. Australia has been drawing wheat from New Zealand and India as well as California. Hog products are depressed on extraordinarily heavy re-ceipts of hogs at prominent interior markets.

Drygoods are very quiet, but generally strong in price at New York and Boston. Cotton goods stocks are well under control, and holders are confident. Several grades of bleached goods have been advanced. Print cloths are in moderate sale, firm at New York, but rather easier at Boston. Woolen goods in moderate demand, but in fairly liberal movement, notably underwear and hosiery, prices well held. Flannel manufacturers ask advance on present values, and these goods are in satisfactory movement. Foreign goods are rather duller than usual. Raw wool is firm in price, but active only in the country. Manufacturers' stocks are light. An upward tendency in prices is noted. cotton is good, domestic and export demand at 1-16c decline. Speculation is excessively dull. Crop prospects have improved.

\* Business failures reported to Bradstreet's

number 195 in the United States this week against 201 last week and 212 this week ast year. Canada had 20 this week against 25 last week. The total of failures in the United States, January 1 to date, 5,440 against 4,871 in 1888.

DUN'S WEEKLY REVIEW.

G. Dun & Co.'s weekly review of trade says: The better feeling which was observed a week ago in the iron and steel and woolen industries still continues, and improvement is now felt in prices as well in magnitude of transactions. Meanwhile exports of merchandise increase, and nevertheless gold goes abroad in large amounts, about \$3,500,000 having been or-

The news as to railroad properties is more favorable. A proposition to settle the Northwestern controversy on the basis of an allowance of 60 per cent of through freight to the Lake lines is expected to be accepted. Other difficulties are in more satisfactory shape, and earnings continue in excess of last year's. The general average of prices has again advanced a little.

Reports from other cities indicate provement in trade at Cleveland and Pittsburg, and in the wool and groceries trades at Philadelphia, but are otherwise but little changed. Collections show no improvement on the whole. Especial activity in leather has resulted from the floods in regions where many tanneries are located, and crop leather has advanced fully 2 cents since June 1. The glass trade of Pittsburg is tair. For anthracite coal there is a better demand, with reduced output.

SOUTHERN IRON SALES. The sales of Southern iron continue large, and prices of pig at Pittsburg are rather lower, but the Thomas Iron Company has advanced its quotations to \$17 for No. 1. Better prices are realized for structural and plate iron, and at a tenth of a cent better for bar iron, while the larger demand for steel rails has so stiffened the prices that \$28 is now quoted. Part of the demand re-sulting from the necessity of rebuilding works, bridges and roads destroyed by the flood is but temporary, and yet the consumption otherwise must be on a scale hardly ever surpassed, since prices stiffen with raw iron coming into market at the rate of more than 7,000,000 tons yearly.

Breadstuffs are stronger. Less favorable erop reports are the pretext; probably excessive speculative sales are the cause. Coffee has receded a quarter. Pork products and hogs are lower, but oil has advanced 134 cents. The rise in new sugar continues, 41 cents per 100 pounds for the

pared with a total of 225 last week and 215 the week previous. For the corresponding week of last year the figures were 232. MUST HAVE METERS.

The Philadelphia Company Will Not Furnish

Gas by Contract Any Longer. The Philadelphia Company has determined to put meters in the houses of every private consumer, and there is a great deal of indignation in consequence. Some of the consumers made contracts which they thought would run The Southern Product Continues to be an made contracts which they thought would run for a year, but after a careful perusal of it dis-covered that it could be annulled by either party by giving 30 days' notice.

With a view to abolishing the present system and forcing consumers to use meters the fol-lowing announcement has been made by the Philadelphia Company and 30 days' notice is given:

The Philadelphia Company takes pleasure in an nouncing to its patrons that, after a long series of costly experiments, it is now prepared to furnish natural gas to domestic consumers by meter; acknowledged to be the fairest, safest and most economical method of buying and selling this residuet.

economical method of buying and selling this product.

Owing to the many kinds and sizes of houses supplied, and to the constantiv changing conditions under which the gas is used, and of which it is impossible to take account, it has long been evident that no plan other than the exact measurement of the gas actually consumed could be devised which would be entirely equitable and satisfactory. Several grave difficulties, however, stood in the way of its carlier adoption. The higher pressure at which natural gas is used, as compared with illuminating gas, and the greater volume required per minute for fuel purposes, as well as the different nature of the gas itself, demanded a meter not only unquestionable in point of accuracy, but also of very substantial construction and, consequently, of greater cost than any heretoforce in use. The meter now being manufactured expressly for the Philadelphila Company, is the result of extended experiment, and successfully solves all the problems presented. It is constructed of the best material, for a pressure far beyond what it can possibly be called upon to resist, and each meter will be tested by and beyth cofficial stamp of the City Meter Inspector.

An official of the company, in speaking of the

An official of the company, in speaking of the matter yesterday, said: "We do not intend to matter yesterday, said: "We do not intend to compel any person to use a meter, but will not furnish gas to consumers who will not allow us to put one in. It will be cheaper for the consumer and will save us about 50 per cent in gas, but our revenue will be considerably less, as we are compelled to pay \$25 or \$30 for each meter put in. One man who has had a meter put in his house came to us to-day and said he had saved \$440 during the past month in his gas bill by using a meter. When the people understand this thoroughly I do not believe there will be any objection to the meter system."

Four men who were building an abutmen for a bridge for the Pittsburg and Western Railroad at Millvale, were arrested by 'Squire Young's constable on a charge of trespass pre ferred by Mr. Reed, who claimed they were utilizing his property. The men had a partial hearing before Squire Young yesterday. Noth-ing was settled and the hearing will be con-

## BILE POISONED BLOOD.

with bilious attacks, more especially in the spring months, after the system has been sur feited with hearty food during the winter. The action of the Liver is interfered with, causing an overflow of bile into the blood. The blood carries this bile into every part of the system, causing yellow skin, yellow eyes, liver spots, etc., and often serious cases of bilious fever originate from this bile poisoned blood. A few doses of Burdock Blood Bitters, taken on appearance of bilious symptoms, will remove them and protect the system from a probable

serious attack.

B. B., which will correct the clogged condition of the Liver, cleanse the blood of all impurities and tone up the entire system. It is an acknowledged fact by all who have used BURDOCK BLOOD BITTERS THAT ONE BOTTLE CONTAINS MORE CURATIVE PROPERTIES THAN GALLONS OF ANY OTHER MEDICINE KNOWN. A Horrible Condition.

I was in a botrible condition from dyspepsia and a combination of other complaints. In the morning when I got out of bed it seemed as if I could not strain an one of the could be a seemed as if I could be a seemed as a seemed a ot stand up on account of dizziness, icaring Burdock Blood Bitters high-y recommended, I am now using the rest bottle, and, although not having sed quite a full bottle, the dizziness

To the select and Common Councils of the city of Pittsburg:
The undersigned, Viewers of Street Improvements in the city of Pittsburg, appointed by the Court of Common Pleas of Allegheny county, and authorized by an ordinance passed on the 5th day of October, A. D. 1888, a copy of which is hereto attached, to appraise the damages sustained in the opening of John street, from Mahon street to Soho street, in the city of Pittsburg, and make an assessment therefor under the provisions of and in accordance with an act of Assembly of the Commonwealth of Pennsylvania, entitled, "An act authorizing and directing Conneils of cities of the second class to provide for the improvement of streets, lanes, alleys and public highways, sewers and sidewalks, requiring plans of streets, providing for the appointment of a Board of Viewers of Street Improvements, prescribing their duties, granting appeals to Councils and Court, providing for the assessment and collection of damages and benefits, authorizing the use of private property and providing for filing liens and regulating proceedings thereon, and prohibiting the use of public streets without authority of Councils," approved the 14th day of June, A. D. 1887, respectfully report:

That, having been first duly sworn and qualified according to law, they proceeded in the manner and according to the directions of said act, to discharge the duties of their appointment; and, having given the notices required by said act, they viewed the premises and heard all the allegations and evidence by the several parties claiming damages, and after full consideration thereof, find that no owner of property has sustained any damage by reason of said improvement; that, after ascertaining the whole amount of costs, they made an assessment of the same upon the properties benefited by said improvement; that, after ascertaining the whole amount each property holder is entitled to pay as the proper proportion of said co
